

Empower users to trade within your wallet — without compromising on decentralization, custody, or compliance.

Bakkt Brokerage: Seamless Trading Integration for Crypto Wallets

Embedded Market Access with Zero Disruption

For wallets, adding trading often means reinventing infrastructure, assuming regulatory overhead, or complicating UX. Bakkt changes that. We deliver deep liquidity and fiat rails through a single, compliant API — so you can stay focused on what makes your product essential.

Why Wallets Choose Bakkt

SUPPORT FOR ANY CUSTODY MODEL:

Streamlined trading access without sacrificing the decentralized experience your users expect — while handling **KYC, AML and fiat compliance behind the scenes.**

FRICTIONLESS TRANSFERS:

Support for unrestricted on-chain crypto deposits and withdrawals, enabling asset mobility on your users' terms — **with minimal friction or operational lift.**

INTEGRATED FIAT ACCESS:

Seamless funding via bank connections, ACH, and wire — enabling same-day crypto purchases **without requiring your own brokerage licensing or custom infrastructure.**

EMBEDDED LIQUIDITY INFRASTRUCTURE:

High-performance routing, deep liquidity pools, and compliant trade execution — **all delivered invisibly within your wallet environment.**

Why Wallets Trust Bakkt

U.S.-REGULATED, PUBLICLY TRADED

Subject to **regular audits and strict financial, compliance, security, risk, and governance policies**, Bakkt is built for institutional confidence.

ROBUST SECURITY:

With SOC 1 Type 2 and SOC 2 Type 2 certifications and annual penetration testing, Bakkt meets **the highest standards of safety and security.**

RESPONSIBLE CUSTODY:

Where custody is required, Bakkt delivers institutional-grade asset protection — supported by a network of leading sub-custodians. For non-custodial models, we enable **flexible integration without compromising asset control.**

API-Powered Integration

Bakkt's comprehensive API suite serves as the backbone of our brokerage offering.

Leverage our APIs for:

- ✓ Rapid, universal integration
- ✓ Streamlined KYC/AML and onboarding
- ✓ Out-of-the-box compatibility with wallet infrastructure or crypto-native platforms
- ✓ Easy white-labeling capabilities
- ✓ Seamless fiat onramps and crypto transfers

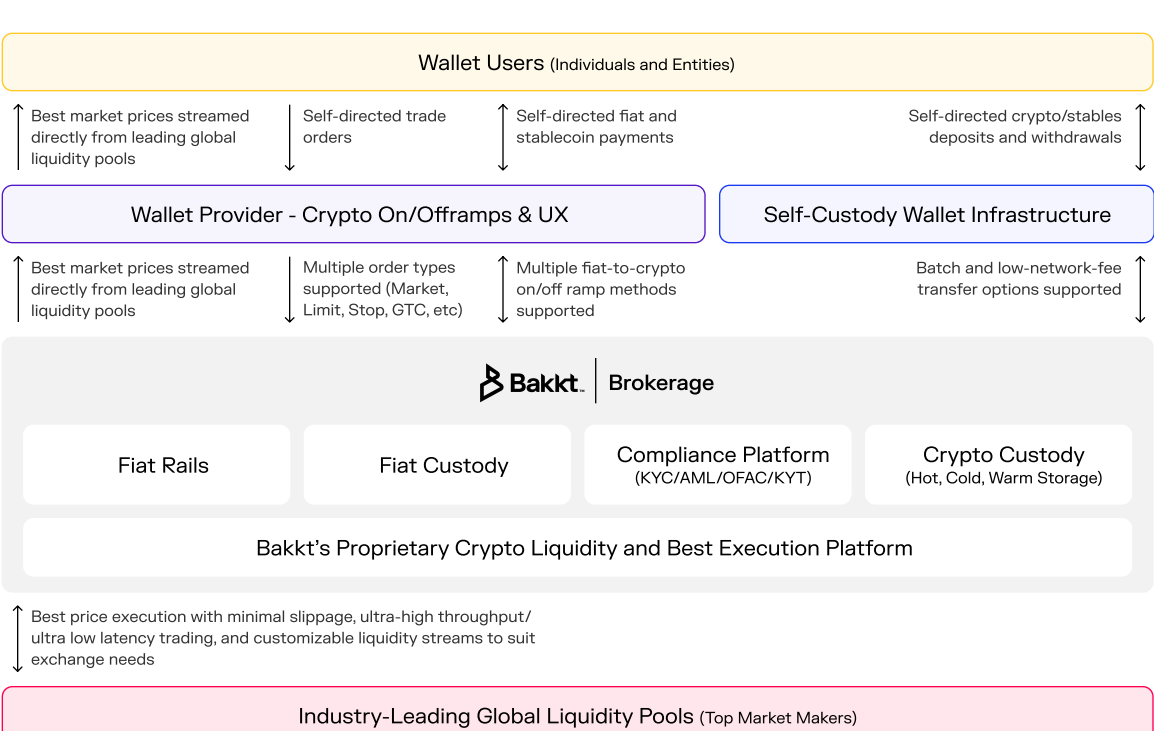

"We were excited to bring crypto trading to our customers, but knew we had to partner with the right provider to deliver the best experience. Bakkt's APIs, deep liquidity network, and licenses to operate in all 50 states ensured we could provide our customers the opportunity to access crypto trading."

— Stephen Sikes, COO of Public

How It Works

Bakkt Brokerage acts as a single point of access to the U.S. crypto market, simplifying liquidity and operations. Wallets connect via robust APIs that facilitate seamless onboarding, trading, and settlement — eliminating the need to build custom infrastructure.
