U.S. Crypto Study
Wave 2

June 2023
Bakkt Crypto Tracker Wave 2

Goals
• Understand and monitor consumer crypto sentiments, adoption, and usage on a bi-annual basis
• Understand barriers to crypto adoption as well as key educational needs for non-crypto owners
• Measure security and regulation concerns and shifts
• Understand consumer openness and trust levels for new crypto acquisition pathways
• Understand similarities and differences among different types of crypto owners, specifically, those who buy from fintech providers

Methodology
A bi-annual tracker was set up among key groups of interest: existing crypto owners and crypto curious
• Wave 1 field date: October 2022
• Wave 2 field date: April 2023 (current wave)

Wave 2 Sample:
Market: United States, adults 18-65
N=2,002
• Crypto Curious = 1,343
  • Defined as those who currently do not own crypto, but, are interested in learning more and/or stated they are likely to purchase in future
• Crypto Owners = 659
  • Defined as those who currently own crypto
  • Additionally, Crypto Owners were segmented by their primary crypto provider:
    • Fintech Crypto Buyers: those who purchase through platforms/apps focused on investing, personal finance, trading, and/or payments, alongside crypto
    • Crypto Exchange Buyers: those who purchase or acquire crypto through crypto-native platforms/apps
• A minimum of 25% representation of HHI $100K+ was maintained in sample
• Participants must be a member of at least 3 loyalty programs
Crypto Owner Participant Profile

Wave 2 study participants represent a range of coin ownership, crypto providers, and storage behaviors.

**COINS PURCHASED IN PAST 12 MONTHS**

Which of the following coins have you purchased in the last 12 months?

- BTC: 71%
- ETH: 43%
- DOG: 36%
- SHIB: 22%
- LTC: 17%
- SOL: 11%

Only those coins with ownership of 10% reported.

**PRIMARY CRYPTO PROVIDER**

Which of the following providers do you use primarily for acquiring or purchasing crypto? (carry forward responses from which crypto providers do you use)

- Coinbase: 36%
- Robinhood: 20%
- Cash App: 10%
- PayPal: 9%
- Crypto.com: 7%
- Binance: 4%
- Other: 2%
- Venmo: 2%
- Venmo: 2%
- SoFi: 1%
- Gemini: 1%
- Fidelity: 1%
- Swan: 1%
- Public: 1%
- KuCoin: 1%
- Stash: 1%

**Value of crypto holdings**

What is the total value of your current crypto holdings?

- <$99: 29%
- $100-$999: 32%
- $1,000-$4,999: 22%
- $5,000+: 14%

**Gender**

Are you...

- Female: 51%
- Male: 48%
- Non-binary: 1%

**Age**

Are you...

- 18-24: 9%
- 25-44: 56%
- 45-54: 21%
- 55+: 15%

**Crypto storage behaviors**

Study participants use a variety of methods to store their crypto, with exchanges being the most common.

Data also found those who own more than $5,000 in crypto are more likely to use browser wallets and offline wallets for storage, in addition to exchanges.

- Crypto exchanges: 67%
- Browser wallets like MetaMask and Phantom: 26%
- Offline wallets like Ledger, Trezor, or paper documentation: 20%
- I’m not sure: 12%

Where do you store your crypto? Wave 2 Crypto Owners

N=669
Wave 2 Executive Summary

OVERALL MARKET OUTLOOK

- Future purchasing consideration still strong for majority of Crypto Owners, with 84% reporting they are likely to purchase crypto in the future, down 5 percentage points from Wave 1. The Crypto Curious report waning interest during same time frame, with 27% likely to purchase in the future, down 11 percentage points from Wave 1.

- Crypto news and events is not top of mind for consumers, as Wave 2 found economic and financial events such as current inflationary environment and recent banking collapses having higher unaided recall. The collapse of FTX is not salient in the consumer mind, with only 11% having unaided recall of that event.

- Overall agreeability and sentiment on statements around crypto’s future has slightly dropped, however, most of the sentiment downgrades were to neutral, rather than to negative.

- Crypto knowledge increased, with higher aided awareness of various coins. Additionally, Crypto Curious made strides in their ability to distinguish between “bitcoin” and “crypto” terms.

REGULATION AND CONSUMER PROTECTION CONCERNS

- Almost 50% of Crypto Owners say they have re-evaluated their crypto providers based on last year’s industry failures.

- Increased crypto regulation (more protections for consumers and more guidelines for crypto companies) assumes more importance in reviving interest in crypto, up 20 percentage point from Wave 21 for the Crypto Curious. Increased crypto regulations assumed more importance for Crypto Owners as well, up 10 percentage points.

- Safety and regulation concerns remain high for both Crypto Curious and Crypto Owners, with the Crypto Curious concern levels increasing 8 percentage points from Wave 1.

FINTECH CRYPTO ACQUISITION

- Safety and regulatory concerns among Crypto Owners vary based on who they consider their primary crypto provider. Those who purchase crypto primarily through fintech providers have significantly lower safety and regulation concerns than those who primarily purchase through traditional crypto exchanges (54% vs. 66%).

- Crypto Curious rated their primary bank, financial advisor, loyalty programs and fintech providers more trustworthy for crypto acquisition than traditional crypto exchanges. In particular, the Crypto Curious rated fintech providers 10% higher than crypto exchanges (46% vs 36%), suggesting existing relationships are key to the next phase of crypto adoption.

- Reasons for purchasing crypto vary by primary acquisition method. Those who purchase primarily from fintech providers bought crypto as a way to diversify their investments rather than a long-term belief in the underlying technology.
Market Outlook
Majority of Crypto Owners inclined to future crypto purchases

Future purchasing consideration still strong for majority of Crypto Owners, in light of recent crypto and banking market collapses. Crypto Curious report waning interest during same time frame. Falling sentiment for both groups driven mostly by those with household incomes over $100,000.

Likeliness to purchase in the future

Future purchasing consideration still strong for Crypto Owners at 84%. Crypto Curious purchasing consideration declines 11 percentage points.

Change in interest in past 6 months

Overall, almost half (48%) say their interest in purchasing crypto hasn’t changed, and 30% report an increase in interest.
Inflation and banking failures top of mind; FTX not salient

Unaided recall of economic and banking news outweighs crypto news recall, suggesting crypto sentiment declines may be driven by overall financial outlook rather than crypto itself. FTX collapse is not salient in the consumer minds (11%), and April’s early bitcoin rally is not top of mind either (7%).

Unaided recall of financial/economic and crypto news

<table>

- 10% FTX collapse / SBF
- 9% Stock market/ investments
- 8% Crypto crash/BTC crash
- 7% Dangerous / fraud/not secure
- 5% Crypto rising
- 3%
Consumer protections assume more importance in reviving interest

For those who said their interest in crypto has decreased in the past 6 months, data shows increased regulation has taken a more prominent role in rekindling their crypto interest, especially for the Crypto Curious. Increasing valuations of the currencies themselves are found less motivating in Wave 2, highlighting the growing importance of consumer protections over gains.

What, if anything, would revive your interest in investing in/purchasing crypto? [Those who indicated their interest in crypto has decreased]

Increased regulation jumps 10 percentage points for **Crypto Owners**

Increased regulation jumps 20 percentage points for **Crypto Curious**
Most consumers still agree more regulation to come

Both groups still agree on crypto’s popularity gain, as well as more regulation to come. Although enthusiasm and agreement about crypto’s future lessened in Wave 2, most sentiment downgrades were to neutral, rather than to negative.

10 percentage points
Regulatory concerns still high, but less so for fintech users

Although safety and regulation concerns slightly declined for Crypto Owners, concerns are still relatively high, at 60%. Level of concern for the Crypto Curious jumped 8 percentage points. For Crypto Owners, their primary crypto provider plays a role in level of concern. Those who primarily use fintech providers for crypto purchases have significantly lower safety and regulation concerns (54% vs. 66%) than those using traditional crypto exchanges.
Crypto Owners evaluating providers with protections in mind

50% of Crypto Owners said they have changed how they evaluate crypto providers after last year’s crypto failures, but less fintech users have reevaluated. When it comes to evaluation criteria, both groups have similar set of priorities, with consumers protections top of mind. Crypto custody ranks lower on the list, suggesting many consumers aren’t yet associating it with risk management practices.

Did the crypto failures of last year change how you evaluate crypto providers?

BitLicense importance increases for both audiences

While no safety and regulation feature stands out as more important to either group in Wave 2, a crypto provider holding a BitLicense increased slightly in importance for both audiences, the only safety feature to do so. Commingling and lending of funds dipped in importance for both audiences.

When it comes to purchasing crypto, which of the following safety and regulation features is most important to you?

CONFIDENTIAL & PROPRIETARY
Usage and Attitudes
Strides in industry knowledge for all

Coin aided awareness mostly increased for both Crypto Curious and Crypto Owners, with BTC, ETH, and DOGE as the most recognized.

Aided Brand Awareness: Which of the following crypto coins have you heard of, even if only by name?

- Bitcoin (BTC) 84%
- Ethereum (ETH) 37%
- Litecoin (LTC) 23%
- Polygon (MATIC) 12%
- DogeCoin (DOGE) 57%
- Shiba Inu (SHIB) 27%
- Cardano (ADA) 11%
- Solana (SOL) 13%

Wave 1 All: 2,104
Wave 2 All: 2,002

Crypto Curious crypto literacy grows

The Crypto Curious have made strides in their ability to identify that Bitcoin is a type of crypto, and, that the terms "crypto" and "bitcoin" are not one and the same.

This distinction suggests consumers are gaining the knowledge to take important steps in the flight to quality.

Please select the option that best describes your understanding of the relationship between the terms Crypto and Bitcoin:

- Wave 1
  - Not sure 26%
  - Crypto and Bitcoin are the same thing 9%
  - Crypto and Bitcoin are two different things 10%
- Wave 2
  - Not sure 24%
  - Crypto and Bitcoin are the same thing 16%
  - Crypto and Bitcoin are two different things 11%
- Wave 2 additions
  - Bitcoin is a type of crypto 55%
  - Crypto and Bitcoin are the same thing 48%

Please select the option that best describes your understanding of the relationship between the terms Crypto and Bitcoin:

Wave 1: Crypto Curious N=1,403
Wave 2: Crypto Curious N=1,343
Crypto utility, such as payments, has declined

While general trading activity remains consistent across study waves, crypto utility, such as various payment use cases, has decreased. Crypto Owner behavior suggests a shift to the long-term as regulatory debates continue.

Which of the following are ways you have engaged with crypto in the last 6 months?
Wave 1 Crypto Owners: N=701
Wave 2 Crypto Owners: N=659
Fintech buyers see crypto as important portfolio ingredient

Reasons for purchasing crypto vary by crypto owner type and show the unique goals and beliefs of each segment. Those who primarily buy from crypto exchanges are more motivated by the long-term, as well as their belief in blockchain technology. Fintech crypto buyers most strongly view crypto as part of their diversified portfolio. Desire to use crypto for payments is the lowest purchasing motivator for both audiences.

How much do you agree or disagree with the following statements about crypto? 1: "Strongly disagree" - 5: "Strongly agree" Crypto trading platform providers vs. Fintech providers: Crypto Owners N=571
Trust and regulation become bigger barriers for new entrants

Educational hurdles remain top barriers for the Crypto Curious, while both lack of trust and regulation increase almost 10 percentage points.

You indicated earlier that you have never purchased crypto. Which of the following describes why you have never purchased crypto?

Wave 1: Crypto Curious N=1,403
Wave 2: Crypto Curious N=1,343
Next phase of crypto adoption powered by existing relationships

Although trust is a growing barrier for new market entrants, data suggests trust can be built through channels where the Crypto Curious already have existing customer relationships. Traditional exchanges are most out of favor with Crypto Curious, with the fintech channel significantly more trusted than traditional exchanges (46% vs. 36%).
